SUMMARY

I'm a passionate developer with 6 months of experience in React.js, Python, and MySQL. Skilled in building dynamic web applications and efficient back-end systems, I thrive in full-stack development. I'm committed to continuous learning and adapting to new technologies. Eager to contribute to innovative projects and further develop my skills.

PROJECTS

Doctor Appointment Booking App (Full stack) - [Live link](#) DEC-2024

- A platform for creating and managing doctor's Appointments, with core features like booking, Payment, Admin Panel, Doctor Panel and user Interface.
- Technologies used :- React JS, Express JS, Mongo DB, Tailwind CSS.
- Payment Gateway :- Razor Pay.

ChatBi - RealTime Chat Application (Full stack) - [Live Link](#) NOV-2024

- ChaiBi is a real-time chat application that enables users to seamlessly manage profiles, send and receive images, and track online/offline status. Integrated user-friendly features such as secure login/logout, friend search functionality, and personalized profile views. Focused on delivering a smooth and intuitive chat experience, enhancing social connectivity and user interaction.
- Technologies used :- React JS, Tailwind CSS and Firebase for DB and chat Storage.

STYL.myj - Ecommerce Site (Frontend) - [Live Link](#) SEP-2024

- STYL.myj is a user-centric eCommerce frontend site, featuring essential functionalities like secure sign-in/sign-out, product pages, and an intuitive search option.
- Implemented dynamic filtering and sorting options for seamless product discovery, alongside an easy-to-use add-to-cart and payment process.
- Enhanced user experience with an order summary, address details page, and order tracking functionality, ensuring a smooth shopping journey from start to finish.
- Technologies used:- React JS and Tailwind CSS.
